EDUCATION

Colorado State University, College of Agricultural Sciences
Fort Collins, Colorado
Bachelor of Science *May 2028*

- **Major:** Agricultural Economics
- **Minor:** GIS for Natural Resources
- **GPA: 4.0**

Colorado State University, College of Liberal Arts
Fort Collins, Colorado
Bachelor of Arts *May 2028*

- **Major:** Dance
- **GPA: 4.0**

PROFESSIONAL EXPERIENCE

CSU Food Systems Farmers Market Price Reports **Fort Collins, Colorado**
Intern, Colorado State University Extension *June 2026 - Present*

- Manage weekly farmers market price datasets for the CSU Food Systems team, tracking fruit, vegetable, meat, and egg prices across markets statewide (Boulder, Fort Collins, Montrose, Palisade, Pueblo, and more) throughout the season.
- Calculate price summaries (minimum, maximum, and average) in R and compile 5–10 weekly Fresh Produce, Meat & Eggs market price reports published on the CSU Extension site for Colorado growers.
- Produce data that helps local farmers compare market-to-market price variation and set fair pricing for farm stands and CSA shares.

ESIIL Stars Internship Program **Boulder, Colorado**
Environmental Data Science Innovation and Impact Lab, NSF-supported *June 2026 - July 2026*

- Selected for the competitive, NSF-supported ESIIL Stars Internship; applied Python, GIS, and collaborative data science tools to a real-world environmental research project.
- Conducted team geospatial research analyzing forest cover change and urban expansion across the elevation gradient of Colorado's Front Range (2001–2021) using NLCD land-cover data and Landsat satellite imagery.
- Processed and analyzed multi-year geospatial datasets in Python and GIS, then presented final findings to program mentors and peers under the guidance of Dr. Sandra Durán and Dr. Mohammad Saif.

Equitable Agriculture and Environmental Management Program **Santa Barbara, California**
Intern *July 2025 - July 2025*

- Conducted applied research in a two-week intensive program on agriculture, integrating policy, economics, and environmental management frameworks.
- Collaborated closely with a student team to analyze geospatial and statistical data using R and ArcGIS, identifying causal relationships between tire-wear particles and water pollutants.
- Co-developed and presented policy-oriented solutions to university faculty and peers, demonstrating strong teamwork, analytical rigor, and communication skills in translating research findings into actionable insights.

Undergraduate Research Assistant **Fort Collins, Colorado**
Intern under Dr. Lauren Chenarides *October 2025 - June 2026*

- Collected, cleaned, and managed educational and agricultural datasets using R and Microsoft Excel.
- Conducted statistical analysis to evaluate educational outcomes, focusing on the behavioral, emotional, and cognitive constructs of student engagement.
- Translated analytical findings into clear summaries that support data-informed decisions.

In-N-Out Burger **Timnath, Colorado**
Level 6 Associate *October 2022 - Present*

- Serve as an official store trainer, cooking and maintaining quality across thousands of burgers daily while working closely with new hires to uphold food quality and customer service standards.
- Collaborate with team members in a fast-paced environment, serving hundreds of customers per day.
- Contribute to the highest-efficiency three-grill drive-through store in the company, handling over 100 cars per hour.

LEADERSHIP EXPERIENCE

BlueChip Leadership Experience – University of Arizona **Tucson, Arizona**
Volunteer for Junior Achievement of Arizona *August 2024 - May 2025*

- Instructed kindergarten students for a day, teaching them basic concepts of financial literacy through interactive activities.

SKILLS, ACTIVITIES & INTERESTS

Skills: R, Python, and Excel (data analysis, visualization); ArcGIS Pro (mapping); POS systems.
Activities: Member of Kappa Alpha Theta sorority, CSU Dance Student Advisory Committee.
